RAJIB SAHA

R&D Engineer | Electronics & Product Development

Relocating to Hokksund, Norway | joyrajibsaha98@gmail.com | linkedin.com/in/rajib-saha1998/

PROFILE

Hands-on R&D and electrical engineer with experience spanning hardware development, electrical design, product documentation, system integration and verification. Experienced in AutoCAD Electrical, BOM/PDM workflows, engineering changes, SCADA/RTU systems and electronics prototyping. MSc in Green Energy Technology (Smart Grid). Incoming Product Development Engineer at OSO Hotwater AS from 7 December 2026.

CORE CAPABILITIES

Product & hardware R&D: Electrical schematics, component selection, BOM, PDM (SmarTeam), ECO, testing, validation, fault analysis and documentation.

Electrical & automation: SCADA/RTU, I/O verification, Modbus, IEC 60870-5-104, TCP/IP, power systems, instrumentation and low-voltage infrastructure.

Tools: AutoCAD Electrical, MATLAB, Python, SQL, LabVIEW, Jira; practical soldering, breadboarding and prototype assembly.

PROFESSIONAL EXPERIENCE

Incoming Product Development Engineer | From 7 Dec 2026

OSO Hotwater AS · Hokksund — Signed contract for a full-time product development position reporting into R&D. Future role; responsibilities not yet claimed.

Automation Engineer | Jun 2026 – Present

Netcontrol AS (part of ABB) · Norway — Engineering of SCADA/RTU and control systems, electrical drawings, signal verification, I/O testing and technical documentation.

R&D Hardware Engineer | Oct 2025 – May 2026

Ceragon Networks AS · Norway — Developed and maintained electrical drawings in AutoCAD Electrical; BOM and SmarTeam PDM updates; component selection, technical specifications, ECO changes, hardware testing, validation and Ex/ATEX documentation support.

Data Center & IT Infrastructure Engineer | Jun 2025 – Sep 2025

BNP Paribas · Oslo — Technical work on critical power and communications infrastructure, diagnostics and reliability-focused troubleshooting.

Service Engineer (part-time) | Jan 2025 – May 2025

Blue Wireless / ITOX · Norway — Installed and integrated communication systems, including power configuration and network setup.

Network & Field Engineer (part-time) | Nov 2024 – Feb 2025

AA Consultant Group AS · Norway — Installed, tested and troubleshot UTP/fiber infrastructure and network equipment.

Green Energy Intern | Apr 2024 – Dec 2024

I-Labs AS · Oslo — Sensor systems, data acquisition, prototyping and technical analysis for energy-related concepts.

Quality Assurance Engineer | Jun 2021 – Jul 2022

Edotco Group (Axiata) · Bangladesh — Technical field verification, quality inspections, grounding and power-quality checks.

SELECTED PROJECTS & COLLABORATION

Electronics and kinetic art collaboration | Rajat Mondal, Oslo S (2026). Hands-on electronic prototyping and technical support in collaboration with the artist for a public installation. Artistic concept and artwork by Rajat Mondal. Public documentation: Bane NOR Eiendom, “Rajat Mondal på Oslo S”.

Independent electronics prototypes. Assembled and tested microcontroller circuits, custom soldered boards, LED arrays, power electronics and electromechanical prototypes.

EDUCATION

MSc, Green Energy Technology (Smart Grid) | Østfold University College, Norway | Studies 2022–2025; degree awarded Dec 2025.

BSc, Electrical & Electronic Engineering | Eastern University, Bangladesh | 2016–2020; HK-dir approved.

ADDITIONAL

English and Norwegian. Professional approach: careful preparation, dependable follow-through and respectful interdisciplinary collaboration. Selected Trainor and IT courses; certificates provided on request.
